

# TECHNICAL SPECIFICATIONS

Flanged Ball Valves

Sizes 1" - 6"

Series 610XP Fiberglass Reinf. Novolac Epoxy

## 1. SCOPE

Ball valves for corrosive chemical service used in construction of pressurized piping systems.

## 2. SERVICE RATING

Temperature rating from -50 to 300° F as shown on pressure/temperature chart on the reverse side. See Catalog 1000-Supp for temperature limits for specific chemicals.

## 3. MATERIALS OF CONSTRUCTION

- (1) **Body:** Compression molded fiberglass reinforced novolac epoxy resin.
- (2) **Gland:** Hastelloy-C with integral locking plate.
- (3) **Stem:** Hastelloy-C metal insert with molded glass fiber/novolac epoxy composite on all wetted surfaces.
- (4) **Gland Bolts:** Hastelloy-C
- (5) **Stem Packing:** PTFE V-Rings.
- (6) **Thrust Washer:** Glass and carbon-filled PTFE
- (7) **Insert:** Compression molded fiberglass reinforced novolac epoxy resin
- (8) **Seals:** PTFE-coated Viton O-ring.
- (9) **Ball:** Compression molded glass fibers and novolac epoxy resin.
- (10) **Seats:** Virgin PTFE. Glass-filled and cavity-filler seats available.
- (11) **Handle:** PPA-FRP (1"-4"). Stainless Steel handle adapter (6"). All handles have locking provision. Gears available.

## 4. DESIGN

- Valves shall be flanged and conform to the face-to-face dimensions of ANSI/ASME B16.10.
- Valve shall have integral 4-bolt mounting pads and threaded holes for actuator mounting.
- Stems shall be blowout proof.
- Valves shall have a regular port with ball dimensions as shown on Page 2.
- Flanges shall be flat-faced with serrated finish to allow installation in metallic, lined metal, FRP, and thermoplastic piping systems.
- Flange bolt sizes and spacing shall conform to ANSI B16.5 Class 150. DIN, JIS and BS shall be available.
- Disassembly, maintenance and replacement of any parts shall not require machining or bonding.
- Ball and stem strength shall be sufficient to operate with abrasive particles filling the cavity.

## 5. QUALITY ASSURANCE

- The Manufacturer's facility shall be certified to ISO 9001 or equivalent. The Manufacturer shall be certified to the European Pressure Equipment Directive (PED) and the "CE" mark shall be affixed to each valve label.
- Each valve shall be hydrostatically shell tested at no less than 1.43x its rated cold working pressure for 3 minutes.
- Each valve shall be seat tested with air at 20 and 80 psig. The seat test pressure shall be applied successively to each end of the closed valve with the other end open to the atmosphere. No visible leakage shall be permitted for the duration of the tests.

## 6. PACKING AND SHIPPING

Valves shall be shipped in a closed position with both ends capped to exclude dirt and properly boxed to avoid damage. Each valve shall be marked with the manufacturer, valve size, model, serial number, and valve component designations.

## 7. AVAILABILITY

Valves meeting this specification are available from:

Nil-Cor<sup>®</sup>, LLC  
12241 Rockhill Avenue, NE  
Alliance, Ohio 44601  
(330) 823-0500  
[www.nilcor.com](http://www.nilcor.com)

**Pressure/Temperature Rating**

**NOTE:**  
Use 18" length of 3/4" sched. 40 pipe with 6" handle adapter

1. Minimum thread engagement required to develop design joint strength on the actuator mounting pad (composite valve body).
2. Flowing fluid, ball in motion between 0 and 90 deg.
3. Maximum breakaway torque for clean liquid service.
